PERSONAL STRENGTHS

- Problem Solving
- Teamwork
- Willing to learn new technology
- Attention to Detail
- Adaptability

ABOUT ME

A fourth-year Business Computer student at Rajabhat Rajanagarindra University with an interest in Web Development. Currently developing a full-stack web project using HTML, CSS, JavaScript, Node.js, Express.js, and MySQL. Experienced in POS systems, inventory operations, sales reporting, and basic computer troubleshooting. Willing to learn new technologies and improve technical skills through real-world experience. Currently seeking a Web Developer Internship.

PROJECT

Wat Nakhumothanamai Punyaram Website
Full-Stack Developer — Capstone Project | 2026
Tech Stack: HTML5, CSS3, JavaScript, Node.js, Express.js, MySQL, Git, GitHub, Postman

Developed a full-stack website for Wat Nakhumothanamai Punyaram to provide centralized access to temple information, public relations news, religious activities, activity photos, monk information, Buddhist teachings, important places, and contact information. The system includes user authentication and an administrative content management system for managing news, activities, monk information, and temple equipment records, with CRUD functionality for data management.

KEY RESPONSIBILITIES

- Interviewed temple representatives to gather system requirements.
- Designed and developed the temple website as a full-stack capstone project.
- Built REST APIs for managing temple information, news, activities, monk information, and equipment records.
- Implemented user authentication and role-based access control for administrators.
- Developed an administrative system for creating, viewing, updating, and deleting website content, using MySQL for data management and Postman for API testing.
